

CONSTRUCTING FOR THE FUTURE

2021

www.btb.com.tr

We are constructing for the future with continuous innovation and a professional approach since 2012 in more than 10 countries

ABOUT US

BTB CONSTRUCTION

BTB is a contractor founded in 2012 and has successfully completed projects in 10 different countries so far.

After starting the first project in 2012 in Turkey, in the same year in Iraq, 82 km 190 bar Water Injection Pipeline with Exxon Mobil and in 2013 our journey continued with the mechanical work of the three city's water infrastructure project in Georgia. We continued our successful projects in Azerbaijan, Malaysia, Romania, France, Djibouti and Afghanistan. We are continuing our steps for our growth target in all over the world

BTB's priority in all project is the occupational health and the environment. Our company works to fulfill all the requirements of ISO 14001: 2015 and ISO 45001: 2018 standards. In addition to these values, BTB implements a Total Quality Management System in accordance with ISO 9001:2015 standard.

MAT GROUP

First company was BTB Construction & Installation company which was built to make piping, storage tanks and pressure vessel fabrication and installation.

In 2013, BTB started its adventures in different countries and first abroad project was the quality management works of pipeline project in Basrah Iraq. Immediately after Iraq, BTB awarded a project from one of the biggest contractors in the world for water infrastructure project of Kutaisi, Poti and Anaklia cities of Georgia. After completion of many successful projects, BTB started to work in different countries by the reference of its clients.

In 2017 BTB Mechanical Construction Company is built and new Group started to work in new geographies like Afghanistan, Djibouti etc.

Until today, group companies completed projects in 9 countries.

In 2017 Mat Pipe, Mat Industrial and Mtr Steel companies are also built and Mat Group is locked on its targets with different sectors. Activities of the group are generally:

- Construction Projects
- Industrial Projects
- Pipeline / Piping / Instrumentation
- Heavy Industry Equipment Fabrication / Installation
- International Trade

SERVICES

STORAGE TANKS

BTB builds storage tanks of all types and capacities, including design, manufacturing, erection, tests and commissioning stages. Our company which completed many different stages of fabrication and erection of storage tank projects in different countries, is also one the Turkey's first 5 API 653 Authorized Inspection Agency.

At every stage of the work related to aboveground storage tanks, the following standards or different international standards are used according to the demands of the customers.

API Std 650
API Std 653
API Std 651
API Std 620
API Std 652
ASME Sec V
ASME Sec IX

SERVICES

SUPERSTRUCTURE

BTB has successfully carried out superstructure projects in accordance with international quality standards, successful engineering practices and meticulous workmanship that it has always considered.

At every stage of the superstructure works, different standards are used according to the demands of the customers.

SERVICES

INFRASTRUCTURE

Infrastructure projects is one of BTB's workscope especially in growing countries and geographies. In a wide scope of activities; BTB has completed infrastructure projects from water infrastructure to subway projects.

Our first infrastructure project was, Water Supply Infrastructure project of Kutaisi, Poti, Anaklia cities of Georgia which was started in 2013 and completed in 2015. 8 pumping station / reservoirs, water pipelines, steel structure works, equipment installation works are completed in accordance with international standards and Georgian regulations.

SERVICES

PIPELINES

Mechanical designs, stress analysis, surge calculations, spool fabrications, site erections and hydrostatic tests of pipelines are in the scope of BTB, which has successfully completed oil pipelines, water pipelines, gas pipelines and process and internal piping of industrial plants.

Some of the international standards used by our expert pipeline teams with international experience are as follows:

- ASME B 31.3
- ASME B 31.4
- API 1104
- API 5L
- ASME Sec IX
- ASME Sec V

SERVICES

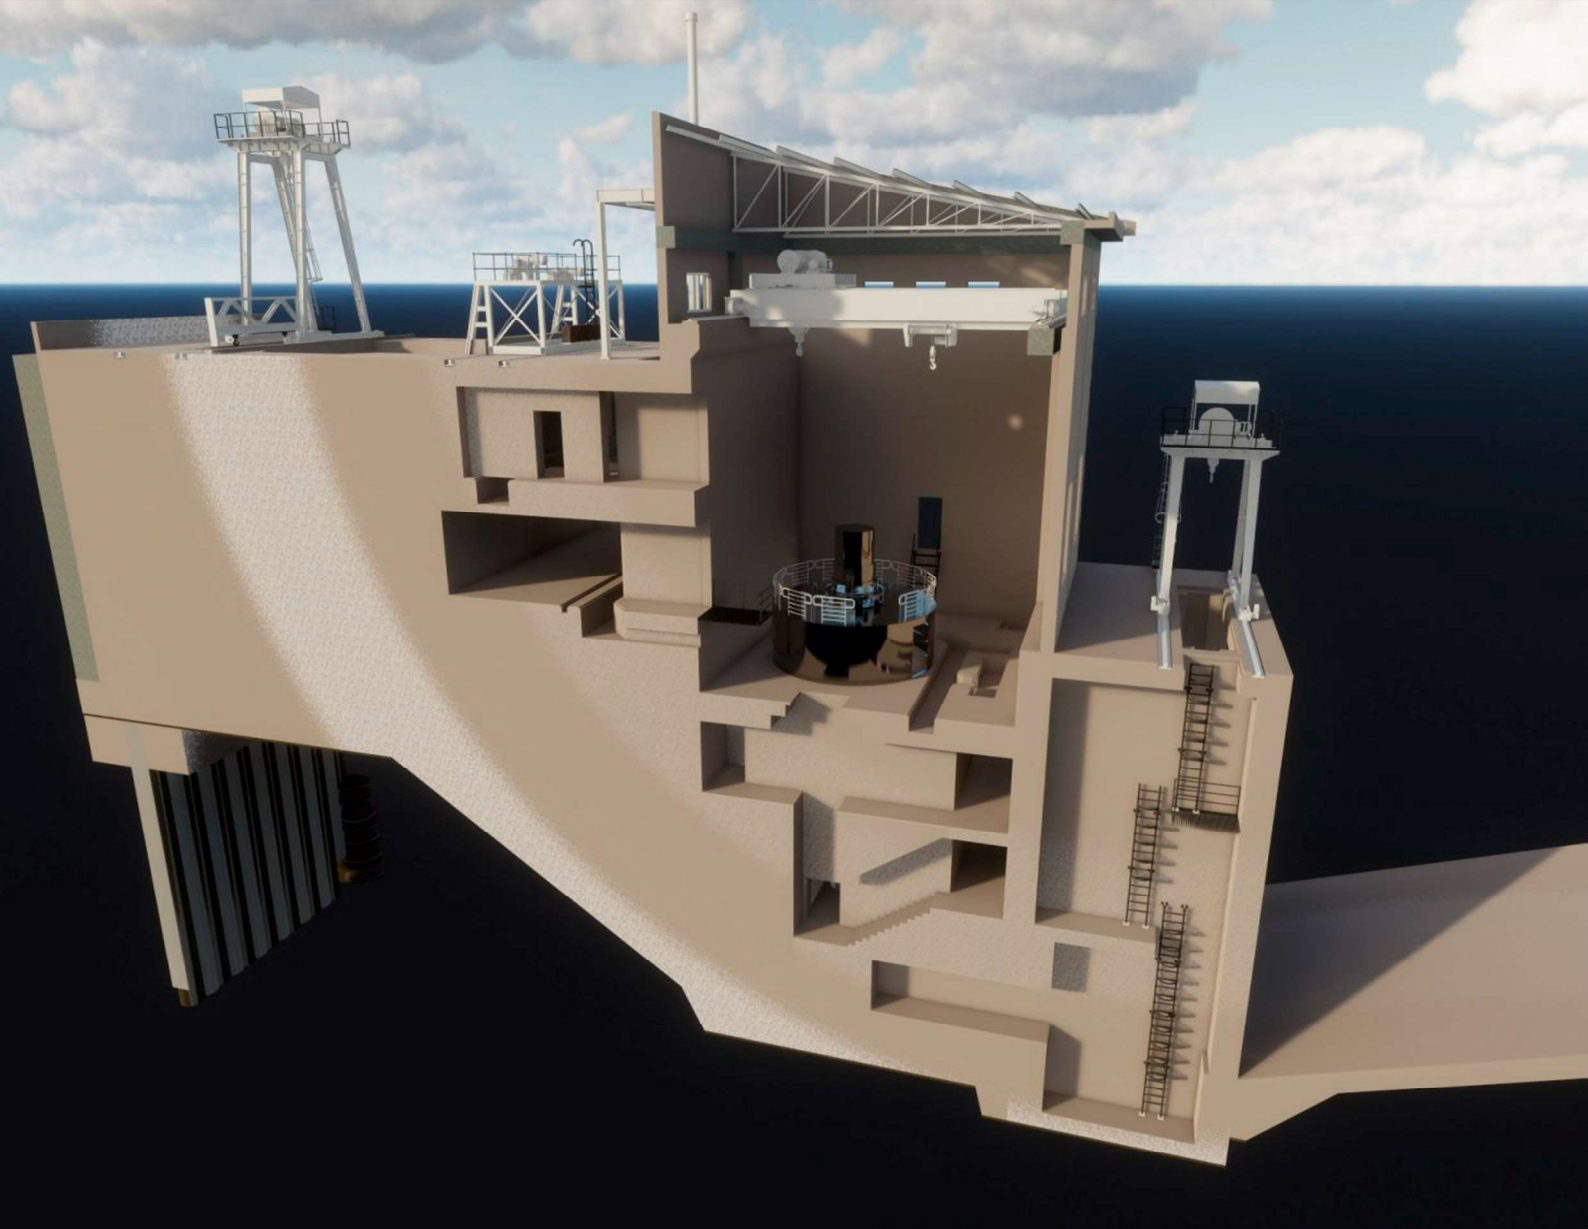

PETROCHEMICAL & ENERGY

All types of equipments, machines, constructions in petrochemical and energy plants are in the scope BTB. BTB as a subsidiary of MAT Group makes cooperation with other Group companies for enlarging the scope in energy projects.

BTB has a long experience about the field from design to commissioning stages.

Some of the plants in scope of BTB:

- Hydropower Plants
- Combined Cycle Power Plants
- Refineries
- Petrochemical Plants
- Detergent Plants
- Food Industry
- Chemical Storage Plants

SERVICES

WATER PROJECTS

Cognizant about the importance of water projects at the present time of world; BTB is giving special importance to improvements of technologies about water. Infrastructure, waste water treatment, water storage, desalination, dams are some of the scopes which we undertook until today.

With our skilled teams and long term experience; design studies, fabrications, site assemblies are carried out by considering all industrial practices, international standards, regional regulations and customer satisfaction.

BTB has completed water projects in Turkey, Afghanistan, Georgia and Djibouti until today. We believe this experience will carry BTB into the future.

Water Supply Infrastructure
Waste Water Treatment
Desalination Plant
Rehabilitations
Warning and Monitoring Stations

FLAGSHIP PROJECTS

TSKALTUBO & TELAVI WASTE WATER TREATMENT PLANTS

BTB worked on the assembly of all mechanical equipment of the wastewater treatment plants built simultaneously in Tskaltubo and Telavi cities of Georgia, placement of piping, making the system operational, and conducting the tests.

Mechanical parts of the project have been carried out by our company by taking advantage of our previous experiences in Georgia for that project which was all designed by French Sade and Veolia companies. BTB also carried out the assembly of equipments and steel materials which were fabricated in Turkey.

Category: Waste Water Treatment
Client: SADE Georgia LLC
Date: 2018 - 2019

ROMANIA FORD FACTORY

In 2016, BTB carried out a project for the maintenance of FORD Factory in Craiova, Romania for the first time and BTB Romania was established.

Fabrication of steel construction works from raw material supply to painting which was designed by Moncobra company was made in our factory in Istanbul.

After the completion of the delivery of the steel construction parts prepared according to the projects, the assembly was carried out together with the Moncobra company at the FORD factory.

Category: Steel Construction
Client: FORD / Romania
Date: 2016
